

**SEC. 202. PROHIBITION OF CERTAIN ANTARCTIC RESOURCE ACTIVITIES.**

(a) **AGREEMENT OR LEGISLATION REQUIRED.**—Section 4 of the Antarctic Protection Act of 1990 (16 U.S.C. 2463) is amended by striking "Pending a new agreement among the Antarctic Treaty Consultative Parties in force for the United States, to which the Senate has given advice and consent or which is authorized by further legislation by the Congress, which provides an indefinite ban on Antarctic mineral resource activities, it" and inserting in lieu thereof "It".

(b) **REPEALS.**—Sections 5 and 7 of such Act (16 U.S.C. 2464 and 2466) are repealed.

(c) **REDESIGNATION.**—Section 6 of such Act (16 U.S.C. 2465) is redesignated as section 5. ●

● **Mr. HOLLINGS.** Mr. President, today I join with Senator KERRY in introducing the Antarctic Science, Tourism, and Conservation Act of 1996, which will implement the Protocol on Environmental Protection to the Antarctic Treaty. The protocol was signed by the United States 5 years ago and approved by the Senate in the 102d Congress; yet implementing legislation remains to be completed. In the 103d Congress, the Senate Commerce Committee reported implementing legislation, but differences among key agencies and interests prevented further action. Now that those differences have been reconciled, it is timely to complete the implementation effort.

I had the opportunity to visit Antarctica in 1988, and can attest both to its pristine beauty and to the unique scientific activities being conducted there. As many of my colleagues know, the activities of U.S. citizens and interests in Antarctica are almost exclusively those of federally sponsored scientific expeditions, together with their Federal logistics support. These activities are concentrated at the edge of the ice shelf and are based at the three U.S. research stations: McMurdo, South Pole, and Palmer. The peak of activity occurs at the height of the Antarctic summer, when there are about 1,200 personnel at McMurdo, 140 at South Pole, and 40 at Palmer. Occasional U.S. tourists visit as well, under the overall responsibility of the National Science Foundation [NSF]. NSF and the National Oceanic and Atmospheric Administration [NOAA] are the main scientific agencies, and the logistics and icebreaking support is provided by the Navy and Coast Guard.

The Antarctic provides scientists with a truly unique laboratory to conduct research that cannot be carried out anywhere else. During my visit I was impressed by a number of dedicated scientists operating under difficult circumstances to help us to understand better our global environment. I witnessed NOAA's ozone hole research at the South Pole, the sampling of ice cores at the Newell Glacier along the coast, and marine biology investigations at McMurdo. Much of this research has implications for the long term survival of human beings.

We must recognize, however, that such scientific endeavors need to be carried out with great care in an environment as fragile as Antarctica's.

This is essential if Antarctica is to remain a natural reserve that is of great scientific value for generations to come. While much has been done in recent years to improve the environmental soundness of U.S. operations there, the Antarctic Science, Tourism, and Conservation Act of 1996 will help to ensure that present and future U.S. activities comply with the highest environmental standards. Implementation of the protocol is long overdue, and I am hopeful that we can enact this bill very soon. ●
